## IN THE CLAIMS

56. (amended) The composition of claim 32 wherein the antigenic peptides are bound to the ligand binding sites by a method comprising the step of:

incubating the cell in the presence of the antigenic peptides, whereby the antigenic peptides are bound to the ligand binding sites.

- 57. (amended) The composition of claim 32 wherein the antigenic peptides are bound to the ligand binding sites by a method comprising the steps of:
  - (a) alkaline stripping of the molecular complex to provide an alkaline stripped molecular complex;
  - (b) neutralization of the alkaline stripped molecular complex to provide a neutralized molecular complex;
  - (c) incubation of the neutralized molecular complex in the presence of an excess of the antigenic peptides; and
  - (c) slow refolding of the neutralized molecular complex in the presence of the excess of the antigenic peptides.
